

MOBILE APPS

Compiled by Susan Zwerman
Chair, DGA AD/UPM VFX/Digital Technology Committee
Production Apps for Filmmakers – August 4, 2020

The DGA makes no warranties for any purpose with respect to companies or products. Mention of any company or product in this document does not constitute endorsement or recommendation by the DGA.

The applications below are geared for use with iPhone and iPad but can be used as a reference tool for other mobile and/or digital devices. Check your digital operating requirements. For content creation in VR, there are powerful VR add-ons to most current software like Unreal Engine and Unity3Dm. For content delivery, there are specific curated libraries such as Within, Transport, LittleStar, and VRIDEO in addition to many VR specific apps for brands such as NYTVR, DiscoveryVR, and more. In this list, only apps that enable use and playback of VR on mobile devices have been included. Most of these apps are now only available on the App Store for IOS devices and not through iTunes.

8mm Vintage Camera:

<https://apps.apple.com/us/app/8mm-vintage-camera/id406541444>

An easy-to-use retro video camera that captures the beauty and magic of old school vintage movies right through your viewfinder. Dust, scratches, retro colors, flickering, light leaks, & even frame shakes can be instantly added. Record videos with sophisticated live effects. Apply and adjust effects while playing a video from photo library. Choose from five unique themes with matching titles, transitions & music. Instantly switch effects for 70 different looks. Supports up to 4K HD recording with real time video effects. Optimized for iPad screen size. For iPhone and iPad. (\$2.99, offers In-App Purchases)

360 Panorama:

<https://apps.apple.com/us/app/360-panorama/id377342622>

360 Panorama turns your iPhone or iPad into a full featured 360-degree panoramic camera. Easily capture immersive panoramas in seconds and instantly share your 360 view with the world. Simply pan the camera and watch as images are stitched. For iPhone and iPad. (\$1.99)

AccuWeather – Weather Tracker:

<https://apps.apple.com/us/app/accuweather-for-iphone/id300048137>

Gives video forecasts and accurate weather information 14 days in advance. Can email weather report directly through your iPhone or iPad. This app may use your location even when it isn't open, which can decrease battery life. For iPhone and iPad. (Free, offers In-App Purchases)

Action Movie FX:

<https://apps.apple.com/us/app/action-movie-fx/id489321253>

Action Movie FX lets you add Hollywood special effects to movies you shoot on your iPhone and iPad. You can add music, sound effects and lens flares to your footage. For iPhone and iPad. (Free, offers In-App Purchases)

Adobe Premiere Clip:

<https://adobe-premiere-clip.en.softonic.com/android>

Adobe Premiere Clip allows fast and simple editing. Drag and drop clips and photos, trim them and visually polish them with lighting adjustments, transitions, slow motion effects and more. You can choose from stock soundtracks or add your own music. Smart Volume smooths audio levels between clips and Auto Mix balances soundtracks with your audio. Save finished videos to your camera roll or send them to Premiere Pro CC for additional editing. For iPhone and Android. (Free)

Adobe Premiere Rush for Video:

<https://apps.apple.com/us/app/adobe-premiere-rush-for-video/id1188753863>

Adobe Premiere Rush has a built-in camera functionality that lets you capture pro-quality videos right from the app and start editing immediately. Choose "Take a Video or Photo", then tap the lens icon to switch. Easy editing to enhance the color with presets and customization tools. It has customizable motion graphics templates. Add music and multiple audio tracks, including 30+ royalty-free soundtracks. Enjoy creative flexibility with multiple video tracks to achieve impressive effects like picture-in-picture and split-view. Easily resize videos from landscape to portrait to square for different channels. For iPhone and iPad. (Free, offers In-App Purchases)

AJA DataCalc:

<https://apps.apple.com/gb/app/aja-datacalc/id343454572>

AJA DataCalc computes storage requirements for professional video and audio media. The app works with all popular industry video formats and compression methods. Supported video standards include NTSC, PAL, 1080p, 1080i, 720p, 2K and 4K. This application allows you to change settings and calculate storage requirements in a single screen with simple controls and a clear, concise display. For iPhone and iPad. (Free)

Available.:

<https://apps.apple.com/us/app/id1094253340>

<https://play.google.com/store/apps/details?id=theavailableapp.com.available>

Available. is an app that functions as a social employment network to help employers and freelancers connect in real time with a one-click availability list including a tag and share function for job posts. Good if you have lots of contacts that the app can access. Saves time texting specific individuals and waiting for responses. Add your crew, then use the calendar to see availability. Once booked, you can give details to the whole crew at once. For iPhone and Android. (Free)

Avid Control (formerly Pro Tools | Control):

<https://apps.apple.com/us/app/pro-tools-control/id1017075761>

Take wireless control of your audio software from your iPad or iPhone. With Avid Control, you can record and mix audio in Pro Tools, Media Composer, Logic, Cubase, Nuendo and other HUI/Mackie DAW's, faster and more easily. The app combines the tight hardware/software integration and high-speed communication power of EUCON technology with the multi-touch advancements of iOS, so you get deep control, with great mixing flexibility. For iPhone and iPad. (Free)

Artemis Pro:

<https://apps.apple.com/us/app/artemis-pro/id1164523253>

<https://play.google.com/store/apps/details?id=com.chemicalwedding.artemis>

Artemis is the first digital viewfinder for smartphones. Over the years it has become an indispensable tool for filmmakers, from film students to Oscar-winners. The new version of Artemis includes a wealth of new features including: record video, trim the ends and add custom title cards, create custom framelines for any shape size or aspect ratio you like, a built-in series of "looks" that provide a way to pre-visualise color grading ideas, the ability to add virtual stand-ins on the live camera feed and in storyboards. For iPhone, iPad and Android. (\$29.99)

Bebot – Robot Synth:

<https://apps.apple.com/us/app/bebot-robot-synth/id300309944>

Bebot-Robot Synth is an app that is part animated cartoon robot and part polyphonic musical synthesizer. When you touch the screen, the robot moves and makes different sounds controlled by your finger movement. Now 64bit and has Audiobus 3 support. For iPhone and iPad. (\$1.99)

BusyCal for Mac:

<https://apps.apple.com/us/app/busycal/id1173663647?mt=12>

BusyCal displays your calendar in Day, Week, Month, Year and List views. What makes BusyCal unique is its ability to customize these views to selectively show specific information to specific departments. (E.g. Choreography schedule to dance, music & AD departments.) You can customize the calendar's appearance by choosing a font face and size, calendar colors, time format as well as drop in graphics. For iPhone and iPad. (\$49.99)

Bubbli:

<https://apps.apple.com/us/app/bubbli/id720480745>

Bubbli is an app for taking 360-degree full sphere photos with your iPhone. It is great for location scouting. You can use the photo spheres for reference later or sharing with someone who could not be at the scout in person. It only takes a few minutes to take the photo, and you do not have to worry about being perfectly aligned. Once you have the photo, you can spin it around on your screen to get a 3D view of the image you captured. The downside is the photo spheres can only be used/viewed online, and cannot be downloaded as images to be edited and used elsewhere. For iPhone. (Free)

Cadrag Director's Viewfinder:

<https://apps.apple.com/us/app/cadrag-directors-viewfinder/id793232740>

Using your smartphone camera, Cadrag simulates the framing of any camera and lens setup. Preview shots instantly and get ready to shoot faster. Cadrag has a built-in gallery and project manager to organize your images and add notes to them. From there, you can email or upload them to your Dropbox and also create PDF shotlists. Cadrag supports spherical and anamorphic lenses and also the use of Metabones Speedbooster adapters. For scouting, the DP can take pictures with it on iPhone with lens sizes and make storyboards from the images. For iPhone and iPad. (\$19.99)

CallPlease:

<https://apps.apple.com/us/app/callplease/id500353840>

https://play.google.com/store/apps/details?id=com.callplease.callplease.app&hl=en_US

CallPlease is truly mobile, working no matter where you are or which device you use. Calls are synced in real-time between all bosses and assistants on IOS and Android platforms as well as the web. Full integration with existing address books makes contact management in CallPlease extremely simple. For iPhone, iPad, and Android. (Free)

CamCard – Business Card Scanner:

<https://apps.apple.com/us/app/camcard-business-card-scanner/id349447615>

CamCard scans and reads business cards and converts images to contacts. It saves contact information in Wallet or iPhone Address Book. For iPhone or iPad. (Free, offers In-App Purchases)

Cameras + Formats:

<https://apps.apple.com/us/app/cameras-formats/id890528993>

Search from over 40 cameras with a list that includes Arri, Canon, Red, Sony, Blackmagic, Panasonic, and GoPro. You can browse by format, from common standards like ProRes and DNxHD to older formats like MPEG-IMX and Betacam. Dig deep into each camera and format, with a wealth of information provided such as dynamic range, sensor size, native ISO, supported resolutions, frame rates, bit rates, chroma sampling, and more. For iPhone. (\$9.99)

Camera Plus Pro:

<https://apps.apple.com/us/app/camera-plus-pro/id345752934>

A simple interface that allows you to quickly shoot, edit, manage, and share photos and videos with speed. See full-screen preview of live photo and video filters before you shoot. For iPhone. (\$2.99)

Celtx Script:

<https://apps.apple.com/us/app/celtx-script/id381536091>

<https://play.google.com/store/apps/details?id=com.celtx.script>

Write and review scripts. Celtx Script makes it easy to write properly formatted scripts on your iPhone, iPad or Android device. Features include automatic formatting to screenplay, A/V, stageplay, audioplay, & comic book industry standards; add notes & comments to your scripts for yourself or collaborators; auto-sync scripts to your free Celtx account and have all your scripts automatically backed up to your online studio. For iPhone, iPad, Mac and Android. (Free)

Celtx Shots:

<https://apps.apple.com/us/app/celtx-shots/id467370902>

Visualize your story and create multi-sequence storyboards, camera blocking, and lighting setups on the fly with Celtx Shots. Create and edit multi-sequence, multi-shot storyboards. Block camera, lighting, talent, prop, set dressing, & equipment setups with an extensive library of 500+ clipart images, or draw your own. View animation with the built-in Storyboard Player. Backed up to and synchronized with your online Celtx Studio. For iPhone and iPad. (Free, offers In-App Purchases)

CheapAir:

<https://apps.apple.com/us/app/cheapair-airfare-deals-compare-cheap-flights-last-minute/id1124420505>

CheapAir is an easy way to shop for cheap flights on your mobile device. Search and book the lowest airfare by entering the name of your destination and travel dates into your phone. For iPhone and iPad. (Free)

Cinefex:

<https://apps.apple.com/us/app/cinefex/id512379220>

For more than 35 years, Cinefex has been taking readers behind the scenes for an exclusive look at the visual magic behind many of the most popular and enduring movies of all time. Current issues are formatted specifically for the iPad with additional photos, interactive imagery and video not available in the print edition. For iPad. (\$4.99 per issue or \$27.99 for annual, 6 issue subscription)

Cine Meter II:

<https://apps.apple.com/us/app/cine-meter-ii/id846918884>

Cine Meter II measures light and color, so you can light and shoot and know what you'll get. For iPhone and iPad. (\$24.99)

CollabraCam:

<https://apps.apple.com/us/app/collabracam-collaborative/id415466771>

CollabraCam is a collaborative video production app. You can edit live from four iPhone, iPad or iPod Touch cameras streaming over Wi-Fi or Hotspot. Shoot on-the-go to get high or low angles, pan, track, dolly, or tilt to get the best shots and capture all the action. When the director begins the session, all cameras start recording simultaneously. As you switch cameras, an Edit Decision List is created. Clips are auto produced at end to create cut. For iPhone and iPad. (\$4.99)

Creative Writer:

<https://apps.apple.com/us/app/creative-writer-fun-easy-write-ideas-for-writing-texting/id737521232>

Creative Writer keeps creativity flowing by offering continuous inspiration. Recycle texts from books, lyrics and movies and combine words into something new, original and beautiful. Creative Writer delivers language expressions for your writing sessions taken from actual books, movies, TV series, song lyrics and other sources. You just tap on the stream of suggested words, selecting what you like until a sentence is formed. For iPhone and iPad. (Free, offers In-App Purchases)

Crew Time Card:

<https://apps.apple.com/us/app/crew-time-card/id466855213>

Crew Time Card tracks your call times, wrap times, daily meal times, earnings, hourly rate, day rate, guaranteed hours, etc. For iPhone and iPad. (Free, offers In-App Purchases)

CROO:

<https://croo.tv/>

CROO is a scheduling app that enables you to design fully customizable commercial schedules and reports. CROO also offers script import and breakdown within the app to help build TV and feature schedules. It also includes a shoot day calendar that can be exported as a PDF and can import storyboards into a shot list or stripboard. This is a web-based application that requires internet access and works on both desktop and mobile platforms through a browser. (Free trial + monthly subscription)

DigiSlate:

<https://apps.apple.com/us/app/digislate/id805684949>

DigiSlate is a modern, free digital slate / clapperboard for iPad, iPhone and iPod Touch. DigiSlate uses either a swipe across the board or the volume buttons on your device to clap the board. This allows you to keep your hands well out of the way when the slate claps. DigiSlate uses the whole screen for the clappers for easier sync on smaller devices. For iPhone and iPad. (Free, offers In-App Purchases)

Director's Viewfinder – PowerFinder:

<https://apps.apple.com/app/powerfinder/id982700271>

PowerFinder is the complete director's viewfinder for your iPhone. PowerFinder reproduces any camera, aspect ratio and lens combination. In addition, it includes a comprehensive list of commonly used motion picture and still cameras. Use the heads-up display overlay to view stats for your shot: focal length, ISO, speed, dutch angle, compass heading, GPS, horizon, aspect ratio, sensor, third lines and color and lightness histograms. Save the shot with data embedded or visible in the frame into a custom album. For iPhone and iPad. (\$19.99)

DJI GO:

<https://apps.apple.com/us/app/dji-go/id943780750>

DJI GO has a live HD camera with a dynamic map view that can be used for drone photography. One can enjoy the experience of capturing and sharing beautiful images, all taken in HD formats. For iPhone and iPad. (Free)

Docs To Go:

<https://apps.apple.com/us/app/docs-to-go-standard/id317117961>

<https://play.google.com/store/apps/details?id=com.dataviz.docstogo>

Read and edit Word and Excel documents on your iPhone (e.g. call sheet). This app can also view PowerPoint, PDF, iWork, Text, and RTF files on both the iPad and iPhone. You need to sync iPhone or iPad with a Desktop application to use. Available for iPhone and iPad (Free Standard Version / \$16.99 for Premium), and Android devices (Free Standard Version / \$14.99 for Premium).

Dropbox:

<https://apps.apple.com/us/app/dropbox/id327630330>

Save and restore documents for moving to multiple devices. Bring your files with you wherever you go. Easy to upload photos and videos to Dropbox. For iPhone or iPad. (Free, offers In-App Purchases)

DSLR Controller:

<https://play.google.com/store/apps/details?id=eu.chainfire.dslrcontroller>

DSLR Controller controls your Canon EOS DSLR from your Android device with a USB cable. No computer or laptop required, no root required, only a compatible mobile device, a compatible camera, and the right USB cable. Compatible cameras and WFT boxes can also be controlled using Wi-Fi (in either Smartphone/Tablet mode or EOS Utility/PC mode). For Android. (\$7.99)

Easy Annotate:

<https://apps.apple.com/us/app/easy-annotate-split-screen-dual-pdf-editor-for-annotating/id727622263>

Easy Annotate is a PDF viewer and editor app that has one unique feature: you can view two documents at the same time side-by-side. One can review, compare, annotate, study or lookup references between the two PDF documents. For iPad. (Free, offers In-App Purchases)

Evernote:

<https://apps.apple.com/us/app/evernote/id281796108>

Evernote is an easy-to-use list maker that helps you remember everything across all of your devices. This app lets you take notes, capture photos, create to-do lists, record voice reminders and makes notes completely searchable. For iPhone and iPad. (Free, offers In-App Purchases)

Field Tools:

<https://apps.apple.com/us/app/field-tools/id305817254>

Field Tools is an efficient depth of field calculator. You can quickly calculate hyperfocus, near focus and far focus distances from a single screen. Features include large, easy-to-read result display; switch distance types with a single touch; sliders for adjusting focal length, aperture and focus distance; the ability to configure multiple cameras and lenses and switch between them with a few touches. For iPhone. (Free)

FileMaker Go 17:

<https://apps.apple.com/us/app/filemaker-go-17/id1274628191>

Use FileMaker Go 17 to create custom business solutions and remotely access these solutions on your iPad and iPhone. FileMaker Go 17 can copy a database to your iPad for offline viewing and editing. For iPhone and iPad. (Free)

FILMiC Pro:

<https://apps.apple.com/us/app/filmic-pro/id436577167>

This app gives you more control over iPhone movie recording. It turns your iPhone into a full-featured HD video camera. For iPhone and iPad. (\$14.99, offers In-App Purchases)

Filmmaker Pro - Video Editor:

<https://apps.apple.com/us/app/filmmaker-pro/id1082956994>

Filmmaker Pro offers 4K video support, unlimited video clips, audio tracks, voiceovers and text overlays. Easily distinguish assets and manage the timeline. Filmmaker Pro offers the ability to select the composition's export frame rate, aspect ratio and change background color. Auto-save ensures edits are never lost. Trim, split or duplicate video clips, adjust video playback speed for a super slow motion or fast motion effect. It contains video grading (brightness, contrast, saturation, exposure, and white balance). For iPhone and iPad. (Free, offers In-App Purchases)

Film Production App:

<https://apps.apple.com/us/app/film-production-app/id888845252>

Whether you are looking for someone to fill a crew position, a pre or post production service, or an equipment rental or sales, this app has it covered. You will find contact information including click-to-email, click-to-web address, click-to-call, and company description for each listing. For iPhone and iPad. (Free)

FilmTouch:

<https://apps.apple.com/us/app/filmtouch/id462637551>

Call sheet management. FilmTouch is an app designed to improve the management of standard PDF call sheets for production pros by adding all your PDF call sheets to a searchable list of crew members, jobs and companies that only you can see. Production sends you a call sheet, you open the e-mail on your iPhone and tap a button to send it to the FilmTouch app. Sort names (and pertinent contact details) by job or company. For iPhone and iPad. (\$9.99)

Final Draft Mobile:

<https://apps.apple.com/us/app/final-draft-writer/id526135686>

With Final Draft Mobile, creativity is truly portable. Wherever you travel, your script travels with you. Write and edit your screenplay on the go, send or share your files between multiple platforms and always be on the same page with Dropbox and iCloud. For iPad. (\$9.99)

Frame.io:

<https://frame.io/>

The modern video workflow. Their cloud-based collection platform enables you to stay connected with all your teams from anywhere on the planet. For iPhone and iPad. (Prices upon subscription)

Flashlight:

<https://apps.apple.com/us/app/flashlight-o/id381471023>

Works like a real, small flashlight. This app helps you see during nighttime shoots, inside or outside. For iPhone and iPad. (Free)

Flightradar24/ Flight Tracker:

<https://apps.apple.com/us/app/flightradar24-flight-tracker/id382233851>

https://play.google.com/store/apps/details?id=com.flightradar24free&hl=en_US

Turn your iPhone or iPad into a live flight tracker and see planes around the world move in real-time. See detailed info about each flight. Point your device at a plane to find out where it's going and what kind of aircraft it is. For iPhone, iPad and Android devices. (Free)

Focus Chart:

<https://apps.apple.com/us/app/focus-chart/id808174720>

This app displays two different focus charts with a siemens star. It prevents the phone from going to stand-by while you're adjusting the back focus of your camera or testing your lenses. Swipe left and right to switch between the two charts. It's a simple yet effective tool for cinematographers, photographers and camera assistants. For iPhone and iPad. (Free)

GarageBand:

<https://apps.apple.com/us/app/garageband/id408709785>

GarageBand turns your iPad and iPhone into a collection of touch instruments and a full-featured recording studio. Use Multi-Touch gestures to play pianos, organs, guitars, drums, and basses, among others. For iPhone and iPad. (Free)

Genius Scan - PDF Scanner:

<https://apps.apple.com/us/app/genius-scan-pdf-scanner/id377672876>

Genius Scan turns your iPhone into a pocket scanner. It enables you to quickly scan documents on the go and email the scans as JPEGs or PDFs. For iPhone and iPad. (Free, offers In-App Purchases)

GoPro (formerly Capture):

<https://apps.apple.com/us/app/gopro-app/id561350520>

This app makes it easy to control your GoPro devices, view your photos and videos, and share your favorite shots on the go. The app transforms your iPhone, iPad or Apple Watch into a remote control for your GoPro—preview shots, start and stop recording, quickly adjust settings and more. Create short clips from your videos, and easily share to social media. You can access your photos and videos in the cloud to view and share anytime, anywhere. For iPhone and iPad. (Free, offers In-App Purchases)

GoodNotes 5:

<https://apps.apple.com/us/app/goodnotes-5/id1444383602>

GoodNotes lets you take beautiful handwritten notes and annotate PDF documents. The handwritten notes are searchable and are created using a pioneering vector ink engine. Thanks to iCloud sync, your documents in GoodNotes will synchronize between your iPad and iPhone automatically. For iPhone and iPad. (\$7.99)

GoodReader PDF Editor & Viewer:

<https://apps.apple.com/us/app/goodreader-pdf-reader-annotator-and-file-manager/id777310222>

PDF reader with advanced capabilities. You can read virtually anything, anywhere: books, scripts, maps, and pictures. The ability to mark up PDFs opens up new doors to GoodReader users who can now use typewriter text boxes, sticky notes, lines, arrows, and freehand drawings on top of a PDF file. For iPhone and iPad. (\$5.99, offers In-App Purchases)

Google Cardboard:

<https://apps.apple.com/us/app/google-cardboard/id987962261>

<https://play.google.com/store/apps/details?id=com.google.samples.apps.cardboarddemo>

Cardboard puts virtual reality on your iPhone. The Google Cardboard app helps you set up a Cardboard viewer to explore exciting environments and view 3D objects. For iPhone and Android. (Free)

Google Drive:

<https://apps.apple.com/us/app/google-drive/id507874739>

https://play.google.com/store/apps/details?id=com.google.android.apps.docs&hl=en_US

Google Drive works similarly to Dropbox, but Google Drive provides more online storage (5GB) than Dropbox. Share documents, spreadsheets and photos with friends anywhere. Keep track of all your various spreadsheets, slide shows, and documents with this simple to use cloud storage app that links all your Gmail files in one place. For iPhone, iPad and Android devices. (Free, offers In-App Purchases)

Google Translate:

<https://apps.apple.com/us/app/google-translate/id414706506>

https://play.google.com/store/apps/details?id=com.google.android.apps.translate&hl=en_US

Translate words and phrases in more than 108 languages (59 offline). Translate text in images for 30 languages by pointing your camera. Take or import photos for higher quality translations of up to 50 languages. Translate up to 43 bilingual conversations by using internal microphone or draw text characters instead of typing for 95 languages. For iPhone, iPad and Android devices. (Free)

iAnnotate 4 - PDFs & More:

<https://apps.apple.com/us/app/iannotate-4-pdfs-more/id1093924230#?platform=iphone>

Read, mark up and share PDF/DOC/PPT/image files. iAnnotate's intuitive interface and customizable set of features make it the "go-to app" for taking notes on lecture slides, annotating important business documents, revising screenplays, grading papers, and much more. iAnnotate is customizable, has a document navigation panel, allows user to have 8 documents open at once, supports Dropbox/GoogleDrive/Microsoft SkyDrive/WebDAV/iTunes file sharing/downloadable PDFs, is secure, and can summarize a document's annotations in the body of an email. For iPhone and iPad. (\$9.99)

iColorama:

<https://apps.apple.com/us/app/icolorama/id490528854>

iColorama is an imaging creativity app for people interested in enhancing their photos or drawings and transforming them into pieces of art. The effects include simple image adjustments to complicated math transforms and beyond. Images can also be painted with a variety of brushes. For iPad. (\$4.99)

iExit:

<https://apps.apple.com/us/app/iexit-interstate-exit-guide/id401746066>

iExit helps you decide where to take pit stops when traveling US interstates. It uses your device's location to determine where you are on the highway and then displays upcoming exits in real time. iExit knows all the gas prices in the United States and can tell you which station is cheapest at each exit. It also shows you where the fast food stops as well as hotels within 3 miles of an exit ramp. For iPhone and iPad. (Free, offers In-App Purchases)

IMDb:

<https://apps.apple.com/app/imdb-movies-tv/id342792525>

https://play.google.com/store/apps/details?id=com.imdb.mobile&hl=en_US

Internet industry database with vast information about films, TV and industry news. For iPhone, iPad, and Android. (Free)

iMotion:

<https://apps.apple.com/us/app/imotion-hd/id421365625>

iMotion is an intuitive and powerful time-lapse and stop-motion app for iOS. Take pictures, edit your movie, and export 1080p & 720p HD videos to your device or directly to YouTube. It can be used to photograph cloudscapes, plants growing, crowds, and stop-motion sequences. For iPhone and iPad. (Free, offers In-App Purchases; iMotion Pro available for \$3.99)

iMovie:

<https://apps.apple.com/us/app/imovie/id377298193>

Great way to do simple edits on the go. For iPhone and iPad. (Free)

Instapaper:

<https://apps.apple.com/us/app/instapaper/id288545208>

Save and access web pages to read when you are without Internet connection. For iPhone and iPad. (Free, offers In-App Purchases)

iStopMotion:

<https://apps.apple.com/us/app/istopmotion-for-ipad/id484019696>

Use iStopMotion to create stop motion animations (AKA claymation) and time lapse recordings on your iPad. Camera overlay the current live camera image with the previous one and see the changes unfold before your eyes. Animate quickly and with a higher degree of accuracy. Easily import and animate to a pre-recorded soundtrack or dub your movie after shooting. For iPhone and iPad. (\$9.99)

Keynote:

<https://apps.apple.com/us/app/keynote/id361285480>

Create world-class presentations with animated charts and cinematic transitions as simple as touching and tapping on your mobile devices. For iPhone and iPad. (Free)

KODAK Cinema Tools:

<https://apps.apple.com/us/app/kodak-cinema-tools/id355215215>

KODAK Cinema Tools covers product demos, sample footage of negative film stocks, technical specifications, filters, etc. The app is designed for you to examine film options before making a final decision. For iPhone and iPad. (Free)

Lapse It:

<https://apps.apple.com/us/app/lapse-it-time-lapse-stop-motion/id539108382>

https://play.google.com/store/apps/details?id=com.ui.Lapselt&hl=en_US

Lapse It is an award-winning app to capture time lapse and stop motion videos. It is easy, fast and intuitive. Capture shots using the camera Full Sensor. This app contains a fast render engine supporting up to 1080p. For iPhone, iPad and Android devices. (Free, offers In-App Purchases)

LumaFusion:

<https://apps.apple.com/us/app/lumafusion/id1062022008>

LumaFusion is a powerful multitrack video editor created for mobile devices. This editing app has three video/audio tracks for photos, videos, titles and graphics in addition to three audio tracks for narration, music and sound effects. Insert and overwrite editing and trimming with professional tools like anchored clips and slip-trim. Video effects including chroma. Contains powerful color correction tools. Add unlimited keyframes to animate your effect or color at any frame. Fully supports 120 and 240 fps slo-mo video files and time lapse video files. For iPhone and iPad. (\$29.99, offers In-App Purchases)

Lumy:

<https://apps.apple.com/us/app/lumy-helps-you-track-photographic-times/id908905093>

Lumy shows you the weather information for the next 5 days so you can plan ahead. You can get Sunrise, Sunset, Morning and Evening Magic hours, Astronomical, Nautical, and Civil Twilight for any location around the world. For iPhone and iPad; Apple Watch compatible. (\$2.99)

LunaSolCal:

<https://apps.apple.com/us/app/lunasolcal/id390175338>

https://play.google.com/store/apps/details?id=com.vvse.lunasolcal&hl=en_US

Calculates times of sunrise, sunset, moonrise, moonset and more at your location on any given date. For iPhone and iPad (\$3.99). For Android (Free).

Magic Hour:

<https://apps.apple.com/us/app/magic-hour/id482426006>

Magic Hour is the time of day around sunrise and sunset when the light is perfect for photography and cinematography. The Magic Hour app makes it easy for you to know when magic hour is coming and how much time you have left once it begins. For iPhone. (Free, offers In-App Purchases)

MagicPlan - 2D/3D floor plans:

<https://apps.apple.com/us/app/magicplan/id427424432>

https://play.google.com/store/apps/details?id=com.sensopia.magicplan&hl=en_US

Visualizing objects within the space is crucial for planning a shoot. With MagicPlan, capture an image of the room to be used, choose objects, and add annotations and attributes to create a fleshed out floorplan within minutes. MagicPlan measures your rooms and draws your floor plan just by taking pictures. For iPhone, iPad and Android. (Free, offers In-App Purchases)

Magic Poser - Art Pose Tool:

<https://apps.apple.com/us/app/magic-poser-pose-tool-for-artists/id1141755970>

https://play.google.com/store/apps/details?id=com.magicposernew&hl=en_US

Magic Poser is an app that allows you to easily pose any number of 3D human art models in any way you want. A must-have app for drawing, comics, storyboarding, character design, etc. iPhone, iPad and Android. (Free, offers In-App Purchases; Magic Poser Pro available for \$3.99)

Magisto Video Editor:

<https://apps.apple.com/us/app/magisto-magical-video-editor/id486781045>

Magisto is a fun and easy way to automatically edit videos and photos and share them with friends and family. This app will turn your video and photos into beautifully edited movies, complete with music and effects in minutes. For iPhone and iPad. (Free, offers In-App Purchases)

MapAPic Location Scout:

<https://apps.apple.com/us/app/mapapic-location-scout/id519612179>

MapAPic is a location scouting app for photographers and filmmakers that keeps all shoot locations in one place with geotags, hi-res pictures, sunrise and sunset times, customized tags, notes, and more. Share a location with your crew by creating an e-mail containing the location's name, notes, address, photos, and a link to the location in Google Maps. For iPhone. (\$4.99)

Marco Polo:

<https://apps.apple.com/us/app/marco-polo-video-walkie-talkie/id912561374>

Marco Polo is a face-to-face messaging app for one-on-one and group conversations. Create as many groups as you like to stay in touch with family and friends in real time. For iPhone and iPad. (Free, offers In-App Purchases)

Mark II Artist's Viewfinder:

<https://apps.apple.com/us/app/mark-ii-artists-viewfinder/id711280537>

Mark II Artist's Viewfinder assists the filmmaker or still photographer in exploring different places and angles to find the optimal placement for the camera. By simulating real camera and lens combinations it allows you to visualize what you are going to shoot without actually setting up the camera. Because it also saves full-resolution photos, you can even use it as a regular camera. For iPhone and iPad. (\$29.99)

MAVIS - ProCamera:

<https://apps.apple.com/us/app/mavis-pro-camera/id979227459>

MAVIS is the ultimate pro filmmaking and broadcast camera for the iPhone. It provides professional level filming tools including focus peaking, waveform monitor, vectorscope, false color and zebras. It gives you audio controls, audio metering, custom resolutions, framerates and recordings formats. For iPhone, iPad and compatible with Apple Watch. (Free, offers In-App Purchases)

MovieSlate 8:

<https://apps.apple.com/us/app/movieslate-8-clapperboard-shot-log/id959690900>

Takes the roles of an all-in-one digital slate, a clapperboard, a shot log tool, and a notepad. With each closing of the clapper, MovieSlate automatically creates a shot log with your production, timecode, notes, and the GPS location of your shots – all easily searchable at a later time. Additional plugins allow MovieSlate to sync timecode with cameras, create audio info logs, and more. For iPhone and iPad. (\$29.99, offers In-App Purchases)

MyRadar Weather Radar:

<https://apps.apple.com/us/app/myradar-weather-radar/id322439990>

MyRadar is free, fast and easy to use. It displays an animated weather radar around your current location, allowing you to quickly see weather patterns coming your way. For iPhone and iPad and Apple Watch. (Free, offers In-App Purchases)

M Stopwatch - A Multiple Stopwatches App:

<https://apps.apple.com/us/app/m-stopwatch/id912819901>

This is simple, straight-forward implementation of having multiple stopwatches in a single list. Add as many stopwatches as you want. Start, stop, reset, delete, and email results on all stopwatches at the same time. Customize the stopwatch with a title and color. For iPhone. (\$0.99)

Notability:

<https://apps.apple.com/ca/app/notability/id360593530>

Notability is a note-taking and PDF annotation app. Drag and drop to move files, text, photos, GIFs, web pages, and more from other apps into Notability. For iPhone and iPad. (\$11.99, offers In-App Purchases)

Noteshelf:

<https://apps.apple.com/us/app/noteshelf/id1271086060>

Noteshelf is a note-taking app and annotate PDFs. This app is the handwriting note-taker that features super natural digital ink, a stunning UI and a comprehensive toolset. Neatly organize all your virtual notebooks on the shelf. For iPhone and iPad only. (\$9.99)

OmniFocus 3:

<https://apps.apple.com/us/app/omnifocus-3/id1346190318>

OmniFocus 3 is a personal task management app. Categorize your tasks by the tool, resource, or location required to accomplish them. For iPhone and iPad (Free Two-Week Trial. Prices vary. Standard now starts at \$49.99).

pCAM Pro - Film+Digital:

<https://apps.apple.com/us/app/pcam-pro-film-digital/id1308057201>

Offers many features for Cinematographers, Camera Operators & Assistants, VFX Supervisors, Script Supervisors and Still Photographers. Calculates Depth of Field, Splits-Aperture Finder, Field of View (Picture Sizes), Focal Length, Exposure, and Running Time Length. For iPhone and iPad. (\$29.99)

PDF Expert - PDF Reader, Editor:

<https://apps.apple.com/us/app/pdf-expert-pdf-reader-editor/id743974925#?platform=iphone>

PDF Expert is fast, intuitive and powerful to let you effortlessly complete literally any PDF task. Quickly open PDF documents from email, the web, or any app that supports "Open In..." Enable full-text search, scroll, zoom in and out. Use Text to Speech feature to hear the selected text read out loud. Highlight and annotate. For iPhone and iPad. (Free, offers In-App Purchases)

PDFpen 12:

https://apps.apple.com/us/app/pdfpen-6/id1507044792?_ga=2.79434388.1659989553.1590516912-877797200.1590516912&ign-mpt=uo%3D4&mt=12

PDFpen 12 allows you to use your iPad to sign a contract, make corrections, fill out an application, add comments on a presentation, and much more. Other app features can be included for additional costs, including PDF OCR capture (scanning), redacting and reordering capabilities, as well as exporting to Microsoft. For iPad only. (\$79.99)

Penultimate:

<https://apps.apple.com/us/app/penultimate/id354098826>

Penultimate, the original and most popular handwriting app for iPad, gives you the natural experience of writing on paper with the added power and availability of Evernote. Take notes, create sketches, or share your next breakthrough idea in the office, on the go, or at home. For iPad. (Free, offers In-App Purchases)

Phonto – Text on Photos:

<https://apps.apple.com/us/app/phonto-text-on-photos/id438429273>

https://play.google.com/store/apps/details?id=com.youthhr.phonto&hl=en_US

Phonto is a simple app that allows you to add text to pictures. More than 400 fonts are available and you can install other fonts. Text can be changed for text size, spacing, color, gradient, shadow, etc. For iPhone, iPad and Android devices. (Free, offers In-App Purchases)

Photo Manager Pro 6:

<https://apps.apple.com/app/id1076480192>

Photo Manager Pro provides a complete solution for managing your photos and videos. The app can be used for background continuity photos and to label and transfer files or photos between your computer and devices over Wi-Fi. For iPhone and iPad. (\$2.99)

Pinnacle Studio Pro:

<https://apps.apple.com/us/app/pinnacle-studio/id552100086>

Pinnacle Studio enables you to quickly and creatively edit video, audio, and photos. Easily arrange your clips in the Storyboard, make precision edits using the Timeline, and add high-quality transitions, effects, and soundtracks. Enjoy 1080p output support and share your movie directly to YouTube and Facebook. For iPhone and iPad. (\$12.99, offers In-App Purchases)

Pocket - Save. Read. Grow:

<https://apps.apple.com/us/app/pocket-save-read-grow/id309601447>

Pocket is a bookmarking app (previously known as “Read It Later”). It’s a handy app to save websites and articles you want to read later. It syncs between all of your devices. You can add tags and adjust settings to optimize your reading/browsing experience. There is also a widget for your browser. For iPhone and iPad. (Free, offers In-App Purchases)

Pocket Call Sheet:

<https://apps.apple.com/us/app/pocket-call-sheet/id371900568>

Pocket Call Sheet generates standard digital call sheets for multiple productions. Instead of relying on a physical production office to schedule your production, Pocket Call Sheet allows you to do it on the road and distribute all the requirements for the following day to your cast and crew. Your Line Producer, UPM, 1st and 2nd ADs can sign off on the call sheet from their devices. Pocket Call Sheet allows you to email call sheets as HTML or PDF attachments. For iPhone and iPad. (\$7.99)

Printer Pro:

<https://apps.apple.com/us/app/printer-pro-print-documents/id393313223>

Print attachments, documents, web pages and more right from an Apple device on any Wi-Fi or USB printer. This app lets you print documents from Mail, PDF Expert, and many other applications on your Apple device that support this function. For iPad only. (\$6.99)

RABS - Run A Better Set:

www.runabetterset.com

The RABS App is everything ADs & Accounting needs for safe, secure, and efficient background (extras) management. The RABS App includes four core technologies: "RABS Digital Vouchers", replacing the paper extras' voucher with digital vouchers, I-9s, W-4s, residency forms, releases, and any other startwork. RABS “Skin” replaces paper skins for a faster check-in; RABS “Skin” tracks extras' times, meals, NDB, MPVs, costumes, and props. "Wrap" enables ADs to check out background in seconds. “Wrap” also creates an automatic extras breakdown. "Hot Cost technology" enables Accounting to streamline BG hot costing and payroll. Production companies can license the service directly from Run A Better Set. Once registered, users can access the app on any device. The newest feature in the RABS App called SIT (Safety Interactive Training), provides a safety training for extras. Approved for all background union and non-union. For iPhone, iPad, Android and iOS. (Pricing varies by production).

Rain Alarm Pro:

<https://apps.apple.com/us/app/rain-alarm-xt/id400259071>

Rain Alarm XT alerts you about rain or snow approaching your location. The app displays and animates the latest radar images from several weather services around the world and relies on your push notifications to notify you 20 minutes before rain approaches your location. For iPhone and iPad. (\$4.99)

ReelDirector II (NEXVIO INC):

<https://apps.apple.com/us/app/reeldirector-ii/id1003175933>

Take complete control of video editing in HD output. ReelDirector II features precision trimming; customizable text; cinematic filters; and multiple export options including portrait & square movies. For iPhone and iPad. (\$2.99, offers In-App Purchases)

Retouch - Remove Objects:

<https://apps.apple.com/us/app/retouch-remove-objects/id1497864609>

Make your photos look better after removing any unwanted objects and lines. Just mark the object that you want to remove and push the "Go" button. The app uses an advanced image processing to remove unwanted objects in seconds. One can fix pimples and blemishes and remove any watermark or object on photo. For iPhone and iPad (Free, offers In-App Purchases)

RoomScan Pro:

<https://apps.apple.com/us/app/roomscan-pro-app-that-draws/id673673795>

RoomScan Pro allows you to scan the room by setting the parameters of walls and windows in the app. The app then draws the layout of the room. For iPhone and iPad. (Free, offers In-App Purchases)

RunPee:

<https://apps.apple.com/us/app/runpee-com/id450326239>

https://play.google.com/store/apps/details?id=air.RunPee&hl=en_US

The RunPee app informs you of the best time to excuse yourself from the movie theater without having to miss an important part of a film. The app lets you know if extra footage will follow the end credits, provides you with a synopsis of the first three minutes of a movie in case you are running late, and contains a built-in timer that alerts you via discreet vibration when a Peetime is coming. For iPhone, iPad, and Android. (Free, offers In-App Purchases)

Scanner App: Scan PDF Document:

<https://apps.apple.com/us/app/scanner-app-scan-pdf-document/id595563753>

Scan and manage documents no matter where you are. One can either scan documents with a single page or a batch of pages, and it automatically recognizes documents by intelligent border detection. Tiny Scanner allows you to customize page size when exporting documents and share documents as PDF or JPG by emailing them or uploading them to iCloud Drive. For iPhone and iPad. (Free, offers In-App Purchases)

Scout GPS, ETA, Maps & Traffic:

<https://apps.apple.com/us/app/scout-gps-navigation-eta-maps-traffic/id467816643>

https://play.google.com/store/apps/details?id=com.telenav.app.android.scout_us&hl=en_US

3D maps with live traffic flow, turn-by-turn directions with manual re-routing, local search, and cheap gas price finder. Now with Facebook integration & enhanced map discovery. For iPhone, iPad, Apple Watch, and Android devices. (Free, offers In-App Purchases)

Scriptation PDF for Film & TV:

<https://apps.apple.com/us/app/scriptation-pdf-for-film-tv/id1094587086>

Revolutionize your workflow with Scriptation, the industry-leading PDF annotation app that instantly transfers your notes — including shotlists, diagrams, photos, and facing pages — into new drafts in seconds. Scriptation allows you to digitally mark up scripts, separate notes into layers, track changes across revisions, and automatically scroll through your script like a teleprompter for virtual table reads. For iPhone and iPad. (Free, offers In-App Purchases)

Scripts Pro:

<https://apps.apple.com/us/app/scripts-pro-screenwriting-on-the-go/id348543183>

Scripts Pro focuses on the creative process and is designed for film and television screenwriters. Scripts Pro automatically generates industry standard screenplay formatting so you stay focused on writing. This app imports, exports, and preserves your Final Draft, Celtx, Fountain and formatted Text files from most desktop script writing software. Full iCloud integration, keeping all of your scripts backed up across all of your iOS devices. For iPhone and iPad. (\$9.99)

SetHero:

<https://setheroapp.com>

SetHero is an app that automates call sheet and production report creation, distribution, and tracking. The interface is easy and elegant and includes a free trial, and pricing increases with project size. The cost is variable based on crew size, number of shooting days, whether or not you add text notifications and/or custom branding. Discounts are also offered if you subscribe monthly, or yearly instead of per-project. They do not currently have a stand-alone phone/tablet app. A 2-day shoot with 10 crew without add-ons for a one-time project is \$11. The monthly subscription for an unlimited crew size is between \$50/mo if you pay yearly and \$100/mo if you pay monthly. You can easily check the cost for your next project using their simple online pricing calculator. (Desktop Only but can connect via Wifi from your iPad.)

Setellite 2:

<https://apps.apple.com/us/app/setellite-2/id956157212>

Setellite 2 is an iPad app for VFX supervisors and post-production professionals. It enables you to collect and register all your on-set VFX data in an organized and effective way. Designed to be used during a (visual effects) shoot, Setellite 2 helps you keep track of all scene info, weather, location, camera, take, plate and reference data on a per slate basis. It is organized and designed to fill in your required data, fast and accurately. The collected results can be reviewed in Setellite 2 itself or exported to PDF and CSV to share with editors, post production supervisors and visual effects team. For iPad only. (Free, offers In-App Purchases)

Shazam:

<https://apps.apple.com/us/app/shazam/id284993459>

https://play.google.com/store/apps/details?id=com.shazam.android&hl=en_US

Shazam is the best way to identify music and TV. Just launch Shazam and point your microphone at the source of the music. In a few seconds, the song title and artist's name appear on your iPad screen. For iPhone, iPad and Android devices. (Free)

Shot Designer:

<https://apps.apple.com/us/app/shot-designer/id556342711>

https://play.google.com/store/apps/details?id=air.us.hollywoodcamerawork.shotdesigner&hl=en_US

Shot Designer is a tool that creates Animated Camera Diagrams with shot lists, storyboards and director's viewfinder and includes integrated sync and team sharing for pro users. Shot Designer dramatically speeds up the director's process of making camera diagrams by creating full-blown diagrams in seconds. For iPhone, iPad, and Android devices. (Free, offers In-App Purchases)

ShotList - Movie Shoot Planning:

<https://apps.apple.com/us/app/shotlist-movie-shoot-planning/id424885833>

ShotList shows a production stripboard on your mobile device, allowing the planning and tracking of every scene of a shoot as it happens. For iPhone and iPad. (\$9.99)

Shot Lister - Film set schedule tool for Directors:

<https://apps.apple.com/us/app/shot-lister-film-set-schedule/id529436218>

Shot Lister revolutionizes the art of shot listing, anywhere from pre-production to the minute by minute decisions on set. The app is designed to deliver the only solution that can build, organize, schedule and share shot lists digitally. For iPhone and iPad. (Free, offers In-App Purchases; Shot Lister Pro is \$13.99)

ShotPro:

<https://apps.apple.com/us/app/shotpro/id924271468>

ShotPro brings pre-visualization to Filmmakers, Directors, DPs and Storyboard Artists on all major platforms. Easy to use interface lets you build compelling 3D sets and scenes. Everything comes to life when you animate characters, props, cameras, and lighting. Intuitive interface for creating and working on scenes. Ability to use real-time performance in 3D. Note that this app uses 2.3 GB of space. For iPhone and iPad. (\$39.99, offers In-App Purchases)

SignEasy:

<https://apps.apple.com/us/app/signeasy-sign-fill-documents/id381786507>

The simplest and fastest way to sign documents from your iPhone and iPad. Great for signing documents on set. For iPhone and iPad. (Free, offers In-App Purchases)

Skitch:

<https://apps.apple.com/us/app/skitch/id490505997>

Skitch lets you instantly communicate your feedback and ideas on documents and photos. You can annotate images and documents with arrows, stamps, shapes, text, and more. Use Skitch to mark up a PDF or photo, snap your screen, or draw something new. For iPhone and iPad. (Free, offers In-App Purchases)

Skype:

<https://apps.apple.com/us/app/skype/id304878510>

Skype connects you with your friends, family and colleagues via instant message, phone calls or video calls for free. The app works on Wi-Fi, even when you do not have cell phone reception.

For iPhone. (Free, offers In-App Purchases)

SloPro:

<https://apps.apple.com/us/app/slopro-1000fps-slow-motion/id507232505>

SloPro app can create smooth slow-motion video. Shoot, edit, and share videos in smooth slow motion without the hassle of transferring files. Edit in/out points, slow motion cues and speeds without waiting. Three slow effects: optical flow, frame blending, and ghosting come standard. For iPhone and iPad. (Free, offers In-App Purchases)

Speedtest:

<https://apps.apple.com/us/app/speedtest-net-mobile-speed/id300704847>

Tests Internet speeds. One tap connection under 30 seconds to find out your upload, download and Ping speeds. For iPhone and iPad. (Free, offers In-App Purchases)

Splashtop Personal - Remote Desktop:

<https://apps.apple.com/us/app/splashtop-2-remote-desktop/id382509315>

Splashtop is the easiest and fastest way to access your Mac or Windows PC desktop from your iPad. Use this app to access your computer on the local network with in-class video streaming performance. For iPad only. (Free, offers In-App Purchases)

Splice:

<https://apps.apple.com/us/app/splice-video-editor-free/id409838725>

Splice cuts together HD photos and videos from your library. You can add music tracks, sound effects, transitions, borders, effects, trim video and audio, and narrate with your own voice. For iPhone and iPad. (Free, offers In-App Purchases)

Storyboard Quick Direct HD:

<https://apps.apple.com/us/app/storyboard-quick-direct-hd/id504372138>

Storyboard Quick Direct turns your iPad into a mobile pre-visualization tool that allows you to create and show off your storyboards and cinematic ideas. The HD version is a bigger, Hi-Def interface to make composing your storyboards even easier. Insert any photo on your iPhone or iPad to use as a location/backdrop or take a photo right where you are and use it instantly. Every frame has its own caption for director's note or dialog. Type your dialog or comments. Press play and watch your storyboard sequence play back on your mobile device. View your entire project as thumbnails in the overview window. For iPhone and iPad. (\$29.99, offers In-App Purchases)

Storyist 4:

<https://apps.apple.com/us/app/storyist-4/id1423912340>

With Storyist, you can produce submission-ready manuscripts and screenplays. Storyist provides a rich text editor with support for comments, images, headers, footers, and style sheets so you can create properly formatted manuscripts and screenplays. One-tap Dropbox sync lets you quickly access your projects where and when you need them. For iPhone and iPad. (Free, offers In-App Purchases)

Sun Compass:

<https://apps.apple.com/us/app/sun-compass-app/id1002027718>

This compass app determines your direction by calculating the current sun position. Less advanced than Helios. For iPhone and iPad. (\$0.99)

Sun Seeker - Tacker & Compass:

<https://apps.apple.com/us/app/sun-seeker-tracker-compass/id330247123>

Sunseeker is a comprehensive solar tracking & compass app. It shows the sun's hourly direction intervals, its equinox, winter & summer solstice paths, sunrise sunset times, twilight times, sun shadow, the golden hour & more. Sunseeker has both a flat compass view & a 3D Augmented Reality (AR) view to show the solar position & path. For iPhone and iPad. (\$9.99)

Sunrise Sunset Pro:

<https://apps.apple.com/us/app/sunrise-sunset-pro/id319184913>

Displays sunrise/set times, dawn, dusk, solar noon, sun positions throughout the day. For iPhone. (\$1.99)

Sun Surveyor (Sun & Moon):

<https://apps.apple.com/us/app/sun-surveyor-sun-moon/id525176875>

Sun Surveyor predicts Sun & Moon positions (azimuth, altitude, time) with its modules: 3D Compass, Map View, Camera View (Augmented Reality) and Details (Ephemeris). Sun Surveyor is useful for film and photo location scouting. For iPhone and iPad. (\$9.99)

SupernovaSuite:

<https://www.supernovasuite.com/>

SupernovaSuite gives the AD Team and Production Office the tools they need to safely and comprehensively manage the day-to-day for the entire crew: from clear, concise, detailed real-time set communication to secure digital documents and safety information. With this app, the crew can access reliable set information via a live-updated daily schedule, as well as a live set update feed with push notifications. Crew members can also securely access in one place all of their digital daily and run-of-show documents -- from call sheets and sides to crew lists and schedules. Producers and UPMs receive sensitive, private delay updates in real time from the AD Department, as well as daily production metrics to help identify problematic, time consuming trends. For iPhone, iPad, Android, and Web (Free)

SuperVision for Cardboard:

<https://apps.apple.com/us/app/supervision-for-cardboard/id1002360596>

https://play.google.com/store/apps/details?id=org.UA.MVRLab.SuperVision&hl=en_US

SuperVision is an advanced magnifier for the visually impaired based on Google Cardboard. You can use it with or without a Cardboard unit. Without the Cardboard, SuperVision is a portable electronic magnifier. When integrated with a Google Cardboard, it becomes a pair of electronic glasses. The application allows for easy control of the zoom, the contrast, and the color mode of the image. For iPhone, iPad, and Android devices. (Free)

SyncOnSet:

<https://apps.apple.com/us/app/synconset/id548827301>

SyncOnSet's secure workflow software is designed to help teams at all levels, from studio to production crew, work faster and improve collaboration whether they're on location or across the globe. With the addition of Asset Hub, studios and productions alike can master asset management from point-of-purchase to archive, tracking inventories, locations and financial data across series, franchise or warehouse. For iPhone and iPad. (Free)

Tableread:

<https://apps.apple.com/app/tableread/id1009176110>

Tableread allows you to read and listen to scripts on mobile devices. Simply import a professionally formatted script in PDF format and listen. Listen to scripts as read by over 45 unique character voices and add an inspiring soundtrack from a library of genre specific scores. Create and export script notes and select voices by gender and age. Upgrade to Pro for further functionality. For iPhone and iPad. (Free, offers In-App Purchases; Tableread Pro - \$2.99 monthly subscription plan)

Tabletop:

<https://apps.apple.com/us/app/tabletop/id436080882>

Tabletop presents a virtualized music-authoring environment with an Expandable Studio and 12 musical devices included. You can add virtual equipment (one piece of gear at a time that provides its own appropriate controls). The app includes a Timeline Editor, MIDI Controller Support, and Session Sharing. For iPad only. (Free, offers In-App Purchases)

TeraView:

<https://apps.apple.com/us/app/teraview/id701205997>

Teradek's iOS application to Play Video from multiple Teradek Video Devices. Stream video in real time from a camera or video source and watch it on your iOS device. Requires a Wi-fi connection. Good for viewing for Video Village. For iPhone and iPad. (Free)

Think Crew:

<https://thinkcrew.com/>

Schedule your film or series with cutting edge tools that help you to create, collaborate and share your shooting schedule wherever you are. Think Crew's cloud based interface allows you to schedule your show wherever you are - and on any device. Upload your script and Think Crew will automatically pull scheduling data from it. Includes never before seen features that empower you to schedule faster and more accurately. You can drag the columns on your day out of days to change the schedule in real time. It works on all devices mobile, tablets and desktop.

For iPhone, iPad, Android, and Web (Free)

Time Card 24 Converter:

<https://apps.apple.com/us/app/time-converter-24-free/id444154009>

A simple application to help convert clock times into decimal times. For example: 6:42 PM to 18.7. This helps in filling out time cards. For iPhone. (Free, offers In-App Purchases)

Timecode:

<https://apps.apple.com/us/app/timecode/id408226969>

Timecode performs ultra-precise timecode calculations and film unit conversions. Calculate and convert any timecode into any other timecode or unit at the touch of a button while using the app. Timecode displays four user-definable units at once, allowing you to view 24 fps, 25 fps, rolls of film and frame results at the same time. For iPhone. (\$6.99)

Tiny Calendar - Sync with Google Calendar:

<https://apps.apple.com/us/app/calenmob-google-calendar-client/id514917848>

<https://apps.apple.com/us/app/tiny-calendar/id514917848>

Google Calendar Client is a native Google Calendar, which inherits the simple and clean look of Google web calendar and makes it more accessible, responsive and reliable on your device. All events and changes are synced and updated to your Google account the next time you connect. For iPhone, iPad, and Android devices. (Free, offers In-App Purchases)

Todoist: To-Do List & Tasks:

<https://apps.apple.com/us/app/todoist-to-do-list-tasks/id572688855>

Use Todoist to help organize, plan and collaborate on projects. One can organize tasks; remember deadlines with reminders and due dates; collaborate on projects by assigning tasks to others; prioritize your tasks with priority levels; and integrate your tools like Gmail, Google Calendar, Slack, Amazon Alexa and more. For iPhone and iPad. (Free, offers In-App Purchases)

Toodledo:

<https://apps.apple.com/us/app/toodledo-to-do-list/id292755387>

Toodledo is a powerful task and note manager that helps organize your to-do list and notes.

For iPhone and iPad. (Free, offers In-App Purchases)

Topsheet:

<https://apps.apple.com/us/app/topsheet/id1436530952>

https://play.google.com/store/apps/details?id=io.topsheet.entertainment.payroll&hl=en_US

Topsheet simplifies production payroll and the payment process. With Topsheet, you can onboard crew, schedule workdays, process time cards, and payroll with ease. You can approve time cards and pay your crews payroll through direct deposit in minutes. For iPhone, iPad, and Android devices. (Free; Payroll Fees per Project)

TouchEdit:

<https://apps.apple.com/us/app/touchedit/id588161783>

TouchEdit is a frame-accurate video editing system for the iPad that uses timecode to export the project to other non-linear systems. To edit, a user has two monitors (a source monitor and record monitor) that are controlled by two corresponding filmstrips. You can control the filmstrips by running your fingers back and forth across them and using gestures to perform edits. For iPad only. (\$24.99)

TripCase:

<https://apps.apple.com/us/app/tripcase/id309620151>

Use TripCase to stay connected and prepared for when you travel. Add all your trip details (flight, dinner reservations, hotel, meetings, etc.) to TripCase. Send your trip confirmation emails to trips@tripcase.com to store into TripCase, or add details manually on your computer or mobile device. For iPhone and iPad. (Free, offers In-App Purchases)

TurboScan:

<https://apps.apple.com/us/app/turboscan-quickly-scan-multipage/id342548956>

https://play.google.com/store/apps/details?id=com.piksoft.turboscan.free&hl=en_US

TurboScan turns your iPhone into a multipage scanner for documents, receipts, notes, whiteboards, and other text. With TurboScan, you can quickly scan your documents and store or email them as multipage PDF or JPEG files. For iPhone, iPad and Android devices. (\$5.99)

VFX Screens Pro:

<https://apps.apple.com/us/app/vfx-screens-pro/id1124129344>

VFX screens is the perfect assistant for CG and VFX artists. It makes integrating visual effects on all types of displays easier while filming and during post-production. It has perfect background colors for chroma keying along with professional tracking markers, and track horizontal Slider. For iPhone and iPad. (\$29.99)

VideoGrade:

<https://apps.apple.com/us/app/video-grade-color-editor-for/id492488712>

VideoGrade features eleven high quality filters that will let you adjust the image on your videos. The app is a flexible and easy-to-use color grading editor for videos that allows you to see real time previews, color channel histograms, clipping previews and split screen mode for comparing the edited video with the original. For iPhone and iPad. (\$5.99, offers In-App Purchases)

Videolicious:

<https://apps.apple.com/us/app/videolicious/id400853498>

Videolicious combines your videos, photos, music and stories into a movie. All you have to do is speak and tap to create a video with audio narration and music. For iPhone and iPad. (Free)

VideoShow Video Editor & Maker:

<https://apps.apple.com/us/app/videoshow-video-editor-maker/id930380089>

VideoShow offers excellent video editing features. You can beautify your videos with texts, FX effects, GIFs, stickers, multi-music, photo filters, transitions, sound effects or live dubbing, etc. HD export, no quality loss. Edit, merge, trim, split, reverse, duplicate or rotate video clips. Add your own voice-overs. For iPhone and iPad. (Free, offers In-App Purchases)

VideoWow – Video Editor, Effect:

<https://apps.apple.com/us/app/videowow-video-editor-effect/id1331377840>

VideoWow helps you edit your video and add special effects to your short video clips. You can also extract MP3 sound from your video clips. It has a video cropping tool that lets you crop video screen and remove unwanted area or a watermark from your video screen. It also has a video resizing tool, video rotation tool and video trimmer tool. For iPhone. (Free)

VidLab – Video Editor & Movies:

<https://apps.apple.com/us/app/vidlab-video-editor-movies/id791557660>

VidLab is a multi-track, multi-clip video editor that allows one to easily create videos and photo stories by adding text, artwork, music, video, sound effects, overlays, voice-overs and more to your videos and photos. For iPhone and iPad. (Free, offers In-App Purchases)

Vivino:

<https://apps.apple.com/us/app/vivino-buy-the-right-wine/id414461255>

Vivino is simply an app for keeping track of the wines you like (for after work). You can scan wine labels to add the wine automatically and restaurant wine lists. There is an easy interface to rate each wine. And there's a market that let you shop, discover wines and order the wine you like. For iPhone Only. (Free)

Vizmato - Video Editor & Filter:

<https://apps.apple.com/us/app/id496232649>

Vizmato is an easy-to-use movie maker that lets you add filters, themes, music, effects and text to make your videos super cool. You can add text, filters, themes, visual effects and background music to transform your video. The reverse tool allows you to play your video in reverse. Choose from over 20 visual filters and themes to give your movie a look. Vizmato is your own HD Video and GIF Recorder. One can use a range of filters, themes and instant video fx while recording in real-time. Record in slow motion or fast pace to adjust the pace of your movie. Add music while shooting videos to get your lip sync just right. For iPhone and iPad. (Free, offers In-App Purchases)

Vizzywig - Record & Edit Videos:

<https://apps.apple.com/us/app/vizzywig-video-editor/id913424818>

Vizzywig is an all-in-one movie-making experience subscription that combines recording and editing in the camera view with tutorials and fresh creative content like background music tracks, studio intros, titles styles, filters and more updated frequently. (Free, offers In-App Purchases)

Voxer Walkie Talkie Messenger:

<https://apps.apple.com/us/app/voxer-walkie-talkie-ptt/id377304531>

This is a Walkie Talkie app for smartphones. Send instant audio, text, photo and location messages to your crew. Your crew can listen to your message if their app is turned on and they are on Wi-Fi; otherwise, it will save like a text message for you to hear later. For iPhone and iPad. (Free, offers In-App Purchases)
